

COLOR ME – Use markers, crayons,
or paint to bring your salmon to life.

DECORATE ME!

DECORATE ME – Glue on: blue ribbons for clean water,
sparkles for fish scales, leaves/sticks for habitat.

PERSONALIZE IT – Add your name or draw animals that need salmon (bears, eagles, orcas)

SALMON SUPER POWERS

Salmon have built-in GPS!

Cold, clean rivers help the salmon smell their way home. Polluted water? It's like a broken google maps!

Salmon are cold-blooded athletes!

They need water below 18°C (64°F) to survive—like needing ice cream on a hot day!

Salmon are nature's gardeners!

Their bodies feed forests after they die. Dirty water = no fish = hungry trees!

WHY SALMON NEED YOU!

Salmon are superheroes of the river. They feed bears, eagles, people and even trees! But they're in trouble: warming rivers and pollution make their journey dangerous. Your flag will show the world you care. When you're done, tape it to a stick and wave it proudly on Wild Salmon Day, June 1st.

Teachers/Parents/Guardians: Tag #WildSalmonDay and #RaiseTheFlag to be featured!

SALMON SUPER POWERS

Salmon are river cleaners!

Their journeys stir up nutrients—like a giant underwater blender making smoothies for the forest!

Salmon are ice-bath champions!

They love chilly water—it's like their energy drink! Warm water? That's a sleepy-time snooze-fest.

Salmon are jumping machines!

They leap 10 feet high—that's two of you stacked up! But they need cold water to flex those muscles.
